Professional Summary

AI & Data Science graduate with hands-on experience building AI-powered applications using Python, FastAPI, LangChain, LangGraph, React, and PostgreSQL. Experienced in developing Retrieval-Augmented Generation (RAG) systems, LLM-based assistants, machine learning models, and REST APIs. Skilled in Generative AI, NLP, backend development, and data analytics, with a passion for creating scalable AI solutions that solve real-world problems.

Education

Jeppiaar Institute of Technology

B.Tech in Artificial Intelligence & Data Science, CGPA: 8.03

2022 – 2026

Chennai, India

Experience

Software Engineer Intern

Jan 2026 – May 2026

Zeesoft Software Solutions

- Developed and maintained software features for client applications using modern development practices.
- Collaborated with senior developers to build backend functionality, REST APIs, and resolve technical issues.
- Debugged production issues, tested deployments, and improved application performance and reliability.

Data Intern

Aug 2025 – Nov 2025

QiBR Technologies

- Cleaned, transformed, and analyzed datasets using **Python** and **SQL**, automating repetitive data-processing tasks.
- Optimized backend data workflows and supported business intelligence reporting through data visualization and analysis.

Machine Learning Intern

Sep 2024 – Oct 2024

AK Info Park

- Developed machine learning pipelines for structured datasets, including data preprocessing, feature engineering, and model training.
- Improved model performance using **Scikit-learn**, hyperparameter tuning, and model evaluation techniques.

Projects

AI-First CRM – HCP Interaction Module | React, FastAPI, LangGraph, PostgreSQL, Groq LLM

- Built an AI-powered CRM module for healthcare professional interactions using LangGraph workflows.
- Developed FastAPI backend services and REST APIs, integrating PostgreSQL for structured data storage.

LawAssistBot – AI Legal Assistant | Python, FastAPI, LangChain, GPT, HTML/CSS/JS

- Developed an AI legal assistant powered by LLMs for automated legal document generation and case summarization.
- Built REST APIs for frontend integration and added conversational legal advice features.

Intelligent Metadata Query System | Python, Gemini AI, NLP

- Built an intelligent metadata retrieval app that converts natural language into metadata queries.
- Automated schema mapping and document retrieval, improving search efficiency using NLP techniques.

Smart Speech Assistant for Stammerers | Python, Speech Recognition, NLP

- Designed an AI assistant for people with speech disorders, detecting speech disfluencies in real time.
- Provided real-time feedback and tracked user progress over time.

Technical Skills

Programming Languages: Python, JavaScript, SQL

Machine Learning: Machine Learning, Deep Learning, TensorFlow, Scikit-learn, NumPy, Pandas, Data Preprocessing, Feature Engineering, Model Evaluation

Generative AI: LLMs, RAG, Prompt Engineering, AI Agents, Agentic AI, LangChain, LangGraph, Hugging Face, OpenAI API, Embeddings, Vector Search

Backend & Web Technologies: FastAPI, REST APIs, Node.js, Express.js, React.js, HTML5, CSS3

Databases & Vector Stores: PostgreSQL, MySQL, MongoDB, FAISS, ChromaDB

Data Analytics: Power BI, Tableau, Microsoft Excel, Dashboard Development, Data Visualization

Developer Tools: Git, GitHub, Postman, VS Code, n8n

Certifications

Machine Learning A-Z (AI, Python & R + ChatGPT)

Data Analyst in Python, SQL, Tableau & ChatGPT with Projects

Complete Web Development Training
